

## Arvor 215

Arvor says its brand has built an enviable reputation among the fraternity of serious fishers and pleasure boaters alike. Recently the company launched its new 215 model, which comes with a full walk-around layout, similar to the original Arvor 20.

As the name suggests, the Arvor 215 spans 21.5ft or, to be more precise, it has a hull length of 6.36m. With its 115hp common rail Cummins CMD diesel, the 215 is capable of speeds over 20 knots (37km/h), while the efficiency of direct shaft drive helps keep maintenance costs under control, says Arvor.

Hydraulic steering comes standard, as well as emergency tiller steering, which allows the boat to be driven at low speed

from the stern deck. A state-of-the-art 'SmartCraft' engine display system places key information right at the skipper's fingertips. This innovative digital readout integrates key information in one display, including fuel consumption, oil pressure, temperature and more.

Standard equipment on the Arvor 215 includes an electric windlass with an anchor locker and mooring cleats, all fitted at the factory. The lockable wheelhouse comes equipped with a large double berth, stainless steel handrails, an interior light, VHF radio, compass and an AM/FM CD player. In the stern there's a live bait tank with an electric pump and cutting board, plus a swim platform with a stainless steel ladder and an outboard bracket.
